

```

1  ### Add vue to your project
2  ```html
3  <script src="https://cdn.jsdelivr.net/npm/vue/dist/
•  vue.js"></script>
4  ```
5  ### Conditionals
6  ```html
7  <div v-if="myVariable === 3">three!</div>
8  ```
9  ### Loops
10 ```html
11 <div v-for="item in items">{{ item }}</div>
12 ```
13
14 ### Event Handling
15 ```html
16 <button @click="myFunction">Click me!</button>
17 ```
18
19 ```js
20 ...,
21 methods: {
22   myFunction (event) {
23     ...
24   }
25 }
26 ```
27
28 ### reactive value + input event
29 ```html
30 <input type="text" :value="myValue" @input="myValue =
•   $event.target.value"/>
31 <input type="text" v-model="myValue"/>
32 ```
33
34 ### define components
35 ```js
36 const MyComponent = {
37   template: `
38     `,
39   props: {},
40   data() {
41     return {}
42   },
43   methods: {}
44 }

```

```
45   ```
46
47   ### use own component
48   ```js
49   {
50     ...,
51     components: { MyComponent }
52   }
53   ```
```
